*Benchmark is the MSCI World Index ex Australia.

**The Income Index is used to assess the performance of the Fund over a shorter period than the longer-term investment horizon of the benchmark. It comprises 50% of the Fund's benchmark (the MSCI World Index ex Australia) and 50% of the Put Write Index, an all income index which serves as a proxy for the Fund's income-generated returns.

Monthly performance review

The Fund returned 4.82% in January, ahead of the benchmark return of 4.35%. This return comprised:

- a return of (0.18%) from the portfolio (in USD); and
- a positive return of 5.00% from the weakening of the Australian dollar versus US dollar.

Lower risk returns

The strategy's high-income generation and active tail risk program are designed to lower risk and deliver equity returns with a smoother, more retiree-friendly return profile. As a result, returns are expected to add relative value in weak and low-growth markets, and to drag in more positive markets. We assess this return profile in USD to strip out the influence of the AUD/USD currency movements.

Source: Wheelhouse

Wheelhouse is a retirement solution designed to deliver better investment outcomes to Australian retirees. Our philosophy is based on three pillars:

- investing in global equities as a **growth asset** to address longevity risk;
- shaping returns to be **retiree-friendly** with lower volatility, better capital preservation and consistent income; and
- delivering a **lower cost** solution to help improve outcomes.
