

4D Global Infrastructure Fund

Performance report | 31 May 2022

Overview

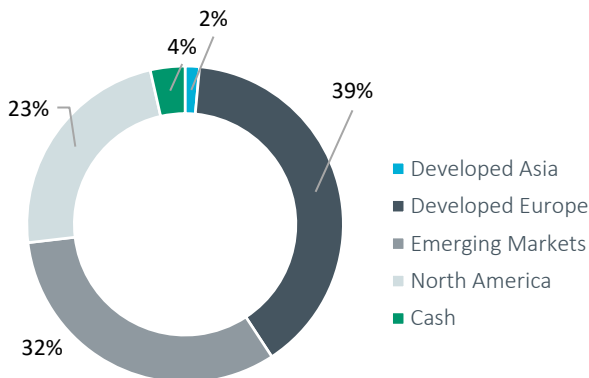

4D Infrastructure is a boutique asset manager investing in listed infrastructure companies across all four corners of the globe. Our investment objective is to identify quality infrastructure companies, trading at or below fair value with sustainable, growing earnings combined with sustainable, growing dividends. The 4D Global Infrastructure Fund aims to outperform the OECD G7 Inflation Index + 5.5% p.a. over the medium to long term (before fees).

Net client returns (after fees and expenses)

	1 mth	3 mths	6 mths	1 year	2 years p.a.	3 years p.a.	5 years p.a.	Since inception ² p.a.

Jasa Marga	3.98
Getlink	3.85
Shenzhen International	3.79
Williams Co	3.65
Enel Spa	3.54
Fraport	3.52
AENA	3.41
Sempra Energy	3.32
Total	40.44

Sector breakdown

Portfolio performance review

The 4D Global Infrastructure Fund was up a net 2.33% (AUD) in May 2022, out-performing the benchmark's return of 1.30% (by 1.03%) and out-performing the FTSE 50/50 Infrastructure Index which was up 1.45% (AUD). Currency contributed 20bps to performance in May.

The strongest performer for May was Chinese gas distributor, China Gas Holdings Ltd +21.6% for the month off a very oversold position. Concerns around China's ongoing lockdowns and repercussions from last year's gas plant explosion (non-controlled associate) have weighed on the stock and growth expectations. It continues to offer very attractive risk/return at these levels, and we maintain our position.

The weakest performer in May was European tower operator, Cellnex down 5.7% as concerns around inflation and M&A execution continue to pressure the stock. We believe the concerns are unwarranted and continue to rate this stock as a top position.

We continue to believe Central Banks will act prudently and cautiously in adjusting monetary policy in response to inflation pressures. But regardless we believe infrastructure is an asset class that can do well in an inflationary environment, and we believe it is a sensible portfolio allocation at the current stage of the economic cycle. Within infrastructure we continue to favour user pays and real return utilities.

Month in review

Three months after Putin invaded Ukraine with the objective of stopping the expansion of NATO the opposite looks like being achieved. The expected accession of Finland and Sweden to NATO is part of Europe's biggest foreign policy change since Russia invaded Ukraine. For Finland it would end an era of heavy Russian influence, and for Sweden, it would conclude two centuries of neutrality. As the chart from Bloomberg below shows, for NATO the Nordic countries will not only bring extra military capabilities, they will also reduce the vulnerability of NATO's north eastern flank by adding 1,343 kilometres (835 miles) of additional land frontier with Russia and effectively isolating its enclave of Kaliningrad sandwiched between Poland and Lithuania on the Baltic Sea.

■ NATO member ■ Potential NATO member

It is not yet a done deal though with Turkey standing in the way with an array of conditions on new NATO candidates. These include demands to recognize its concerns about Kurdish militias and to end bans on arms exports to Turkey.

The US Federal Reserve delivered the biggest hike in interest rates since 2000 and announced it would start shrinking its massive balance sheet, deploying the most aggressive tightening of monetary policy in decades. The Fed raised its benchmark rate 0.50% and will begin allowing its holdings of Treasuries and mortgage-backed securities to decline in June at an initial combined monthly pace of US\$47.5b, stepping up over three months to US\$95b. *'Inflation is much too high, and we understand the hardship it is causing and we are moving expeditiously to bring it back down'* Chair Jerome Powell said. Treasury Secretary Janet Yellen predicted solid growth in the coming year and a possible *'soft landing'* for the economy.

President Xi Jinping's Covid Zero policy is hurting China's economy, with industrial output and consumer spending sliding to the worst levels since the pandemic began and analysts warning of no quick recovery. Fitch cut its forecast for China's 2022 GDP growth to 4.3% from 4.8%, citing *'pandemic policies'*. It revised its 2023 growth forecast slightly higher to 5.2%, from 5.1%, assuming China will phase out its zero-Covid policy only gradually over the course of next year.

But according to Bloomberg China's plans to bolster growth as Covid and lockdowns crush activity will see a whopping US\$5.3 trillion pumped into its economy this year. This equates to roughly a third of the nation's US\$17 trillion economy but is actually smaller than the stimulus in 2020 which suggests even more could be spent if activity fails to pick-up from its current funk. Bloomberg Economics said there's still a lot of space for a stronger fiscal policy, which is more effective in supporting growth.

Hong Kong's economy contracted 4% year-on-year in 1Q22. US Treasury Secretary Janet Yellen's success in securing the biggest global corporate-tax reform deal in decades last October faces a potential roadblock: approval by her country's legislature. The agreement lacks the universal support of Democrats and faces staunch opposition among Republicans.

In the Philippines Ferdinand Marcos Jr., known as Bongbong, won an election with the largest share of the vote in four decades, a triumphant return to power for a family that abruptly fled the country in 1986 as protesters demanded the end of his dictator father's two-decade rule. Marcos Jr. largely avoided talking about policies on the campaign trail, instead calling for *'unity'* and touting his father's legacy. However, where he did make pledges - to step up infrastructure construction - he may face obstacles, even as economic growth returns.

Fund details

Feature	Information
APIR code	BFL0019AU
Investment manager	4D Infrastructure
Portfolio manager	Sarah Shaw
Reporting currency	A\$ Unhedged
Recommended investment period	Five years
Stock / cash limit	+7% / 10%
No. of securities	40
Application/redemption price (AUD) ³	1.6346/1.6280
Distribution frequency	Quarterly
Management fee ⁴	0.95% p.a. (including GST)
Performance fee ⁵	10.25% p.a. (including GST)
Buy/sell spread	+/- 0.20%
Minimum investment (AUD)	25,000

How to invest
