Quarterly Distributions:

TAMIM Fund: Credit generated a flat return in January, resulting in a twelve-month net return to investors of 7.33%. While disappointing, the result was largely driven by an underlying manager providing for a potential loss in one of the underlying loan positions held. We will provide more detail on this in our longer form quarter report in March. Since inception, the portfolio has delivered an annualised return of 7.26% p.a. net of all fees. Over the six years and 4 months since inception, the Fund has only had one negative month and has paid a quarterly distribution of between 1.4 and 2.24% every quarter. The next quarterly distribution is scheduled to be paid on 15 May 2025. TAMIM remains committed to investing with larger, more established managers
